GodsEye — AI Business Operator

☐ What I Build

Founder shipping AI-native products from Lagos. **Autonomous agents, Telegram bots, real business automation.**

PROJECT	WHAT IT DOES	STATUS
GodsEye	AI business operator — Telegram-first agent that manages WordPress sites, runs operations, and executes tasks	☐ Live
Pandora Box	Multi-agent orchestration — spin up AI agents for any workflow	☐ Building
Social Harness	Omnichannel inbox — manage all social DMs in one place	☐ Building
HyperFrames	Programmatic video rendering from HTML/CSS — built for agents	☐ Building
TrustClaw	Self-hostable personal AI agent with vector memory + Composio tools	☐ Building
Paperclip	Agent orchestration platform	☐ Building

☐ Tools & Experiments

Scaffold — CLI bootstrapper · **Claw Router** — LLM router (30+ models) · **NexaBank** — Digital banking SPA · **gstack** — Claude Code setup

☐ How I Think About AI

The future isn't "AI tools" — it's AI agents that run your business while you sleep.

- **Telegram is the universal interface** — one bot replaces your website, app, and dashboard
- **Agents should think ahead** — not just respond, but propose, plan, and execute with your approval
- **Self-hosted beats SaaS** — own your data, own your agents, own your infrastructure
- **Ship fast, break nothing** — velocity matters, but reliability matters more

☐ Based in Lagos, Nigeria ☐☐ — Building for the world from Africa
